Art in Printing

It is knowing *where* to put the paint, and how much, and what colors that makes the true artist.

It is knowing *where* to put the ink, and how much, and what colors that makes the competent printer.

The right use of printing facilities is our constant study and practice.

We are making a specialty of small work for commercial and other purposes. We invite test orders from those who appreciate technical skill in the production of their printed matter to determine whether it is not better to use this than the kind they have been using. All printing is cheap which fully accomplishes its purpose; all which falls short of its purpose is dear at any price.
